Why choose SafetyNet?

Business continuity can be complicated. Many businesses offer help and services but which one is right for you?

SafetyNet is a selection of services tailored to help small and medium sized companies plan for and prevent disasters; and, if the worst happens, to provide the resources necessary to keep those businesses running - simply and cost-effectively. The solutions are provided by a specialist team operating within SunGard Availability Services in the UK.

- SunGard: Has 30 years' experience in disaster recovery and business continuity.
- Has a proven track record, successfully enabling companies to continue trading in the face of unexpected events over 1,000 times in the UK alone.
- Has won Business Continuity Services Provider of the Year an unprecedented five times out of the eight times it has been awarded.
- Generates annual revenues in excess of £140m so is financially secure.
- Employs almost 500 staff in the UK.
- Has more than 10,000 workplace/office recovery positions so capacity is never an issue.
- Offers customers a choice of more than 20 locations and over one million sq ft of secure dedicated operations space.
- Supports more than 4,000 tests every year.
